

EXCURSION TREKKING OJO DEL ALBINO

Starting from your hotel, cabin, or apartment, the journey begins very early at 7:30 in the morning. Leaving Ushuaia, we enter the Andes mountain range, contemplating the landscape offered by the different valleys, forests, rivers, and mountains. We travel on National Route No. 3, and our vehicle drops us off at the trailhead for our hike. After equipment check the guide provides us with our packed lunch, trekking poles, crampons for icy terrain, or snowshoes, as needed. It's a hike of about 9 km, crossing part of the Tierra del Fuego forest and peat bogs, reaching first to Laguna Esmeralda, a glacial lake that is completely frozen during the winter season, allowing us to walk on its surface. After a short rest, we continue ascending to the Ojo del Albino Glacier, which is located several meters higher. The landscape changes around us, and we begin to walk on rocky terrain, high mountain ground that requires greater concentration during the hike. We reach a hanging valley, a result of the glacier's work thousands of years ago during the last ice age. There, we take a break and take the opportunity to have lunch, enjoy a hot beverage while appreciating the surrounding natural scenery. Resuming the ascent, and after climbing a wall, we reach the impressive Ojo del Albino Glacier. In summary, an extraordinary adventure! After spending a few minutes in the area, we begin the return journey to the meeting point with our vehicle and then return to the city.

Schedule.
