

ISLA DE LOS FUEGOS

TREKKING

GLACIAR VINCIGUERRA

We depart from the hotel heading north, through the upper part of the city towards the Andorra Valley, where the trail that will take us to the Vinciguerra Glacier begins. Along the way, we will enjoy a variety of landscapes such as the peat bog, lush lenga forests, and we end up in the high valley of the Leche River, which is located around the glacier. Here, you can take advantage of the wonderful views of the area, and if the weather is on our side, we will take a short break. We continue along the side of the river and finally reach the Icebergs Lagoon. Here, we will continue to skirt the lagoon until we reach the impressive Vinciguerra Glacier. The landscape will reveal to us a mysterious world of crevices and sinkholes that you can capture in photographs. Once the experience is complete, we resume our journey, this time descending towards the Andorra Valley, and then return with transportation to the hotel.
