

ISLA DE LOS FUEGOS

## TREKKING BALCONES DEL SUSANA

Trekking Balconies of Susana offers breathtaking views towards Tierra del Fuego National Park, the Darwin Mountain Range, the Coast and islands of the Beagle Channel, and, of course, the bay and the city of Ushuaia. The excursion includes transportation, so we will pick you up at your accommodation early in the morning, around 9:00 am, and then we will head west to the trailhead that leads to the summit of Mount Susana. After a 1.5-hour ascent through a mixed forest of lenga and guindo trees, we reach the summit of this panoramic viewpoint, the main balcony, with views in all cardinal directions. It is the ideal place for photography, resting, and sharing a snack to regain energy and hydration. The descent begins after a while, taking a different path that offers various viewpoints and perspectives of the Beagle Channel, the city, and the Andes mountain range to the east. Finally, after 5 hours and having covered about 5.5 kilometers, we meet our vehicle again and return to the city.
