

## E-BIKE “ CASCADA BEBAN”

This route begins with transportation from our offices to the old "Sendade losHacheros" in the Tierra Mayor valley. This path was used for fire wood collection in the 1940s and now provides access to multiple landmarks of the Fuegian landscape, such as the Carbajal Valley, the Sorondo Range, and Mount Bonete, among others. Our adventure culminates at the Beban Water fall and the magnificent view of its name sake glacier
