

## E- BIKE “MIRADORES DEL BEAGLE”

The excursion proposes exploring an alternative trail, going through forests and peat bogs, and reaching different panoramic points in the highlands of the city. Starting at our headquarters we hop on modern e-bikes, and accompanied by a guide, we cover a little over 30

kilometers of landscapes and multiple views. This way, we can appreciate the Beagle Channel with its repertoire of islands and Ushuaia Bay to the south. To the east, the profiles of Mount Olivia and Cinco Hermanos stand out on the stage. To the north, the Martial Mountain range, along with the glacier, frames the southernmost city on the planet. Finally, towards the west, Mount Susana and the Darwin mountain range can be seen in the distance.
