

ISLA DE LOS FUEGOS

ESCONDIDO AND FAGNANO LAKES 4X4

We depart at 9:00 AM from your accommodation to explore the glacial valleys of Tierra del Fuego along National Route No. 3.

Our first stop will be at the Carbajal Valley viewpoint, where we will be able to admire the Fuegian landscape and learn about part of its geography.

We will then continue along the route through the winter resort area, including the Cerro Castor ski resort.

From there, we will begin the ascent to Garibaldi Pass, one of the most important panoramic points of the excursion. We will cross the Andes Mountain Range and descend towards the shore of Lake Escondido, where we will take a break to enjoy mate, hot chocolate or coffee with traditional Argentine pastries.

After visiting this impressive lake, we will continue towards the 4x4 circuit, driving along authorized trails until reaching the shores of Lake Fagnano. Once the visit to the Estancia La Carmen outpost is finished, we will head to a winter resort to enjoy an included Fuegian lunch. Afterwards, we will begin our return to the city of Ushuaia.
